

Celebrating our 300th Physio Patient!

The Hamilton Family Health Team has been offering physiotherapy services to patients for the past two years. We are excited to announce that our physio team has recently served their 300th patient!

We know that physiotherapy treatment can make a major difference in a patient's quality of life, but that it can be costly for some people to access. Our services are dedicated solely to patients whose insurance does not cover the cost of physiotherapy treatments. Each day, our physiotherapists are helping patients get stronger so they can get back to doing the activities they love.

Here's what some patients had to say:

“ I loved how the physiotherapist at HFHT took my busy schedule into consideration and tailored my exercises so I could realistically fit them in. Everyone was so open and caring. I felt they were genuinely invested in my progress towards recovery. This was a very positive experience. Please continue this program, it really improved my quality of life.”

“ The personable approach to my difficulty was a perfect match. The take home exercise programs were good to have. I very much enjoyed coming because I felt at home. I find this was different than I expected. It was a more well-rounded approach to my difficulty with my shoulder. I would highly recommend this program to others because they make appointments fun.”
